TIC709-VAD

Two-Wire Video/Audio Distributor

TIC709-VAD is the integrated equipment for supplying power to two-wire indoor station and door station. Its two-wire interfaces and adaptive network interface can support 9 devices and one external switch respectively. Its ingenious design enables it to be mounted on the DIN rail.

- Nine two-wire interface to support nine two-wire indoor stations

- One 10/100M self-adaptive network interface to support external switch

- 24 VDC power supply and communications between door stations and indoor station

- Industrial design and DIN rail mount supported

TIC709-VAD

Two-Wire Video/Audio Distributor

Name	Description
Interface Number	1, 10/100M Interface
Interface Type	9-ch 2-wire Interface
Power Supply	24 VDC
Power Consumption	60 W
Working Temperature	-10 ℃ to 55 ℃
Working Humidity	10% to 90%, No Condensing
Dimensions	112.2 mm x 111 mm x 66 mm (4.42" × 4.37" × 2.60")

Typical Application

Indoor Station

Video/Audio Distributor

Door Station

Electric Lock

Internet

APP

Router

Power Adapter

Two-wire Cable

Network Cable

Wi-Fi

Power Cable
